

# G&W

Engineered to order. Built to last.

**NEW!**

## TRIDENT<sup>®</sup>

Trident-SR with SafeVu

### Solid Dielectric Switchgear

#### BENEFITS:

- High Speed Magnetic Actuator operates in under 3.5 cycles
- No oil or gas for a maintenance-free design low total lifecycle cost
- Deadfront design provides increased operator safety, with no exposed live parts
- Streamlined safety practices by eliminating the need for elbow removal when using SafeVu integral visible-break
- Submersible & weatherproof for use in the harshest environments

#### RATINGS:

- 15kV— 95kV BIL; 630A continuous, 12.5kA fault interrupting
